

SERAJ VAHDATI

Senior Front End Engineer

I'm a passionate software developer with experience across the stack and always keen to try all the shiny new little things the web has to offer. Service workers, composite workers, and everything that works mostly behind a flag. I loves 60fps web interfaces, frontend automation, and offline-first web apps. My expertise includes Javascript, HTML, and CSS. I'm excited to leverage the latest technologies to build powerful and performant applications.

The most recent applications I've worked on utilize frameworks such as React with Redux, and Meteor with React to create modular and performant single-page applications.

Technical Skills

Strong: JavaScript, React, Vue, Redux, Meteor, Express, HTML/CSS, Git, Linux.

Experienced: C++, SQL, AngularJS, Backbone.js, Docker

bimebazar

Tehran, Iran

February 2017 to October 2018

Senior Front End Developer

as a Front End Developer, was responsible for migrating existing jQuery based frontend system to React. The goal was making the migration process in a gradual and consistent way And making this process transparent to users. With a scheduled migration plan and working with a wonderful team, the whole system was migrated properly.

- Identify problems and design practical UI/UX solutions
- Establish a branding style guide that aligns with the design system and front-end infrastructure.
- develop web application using React JS.
- Design & develop beautiful, easy-to-use web applications and sites that support Bimebazar's marketing campaigns.
